

Cyber Guru Coders Lie Detector

CS 555- Agile Methods For Software Development

The Team- Octavio Morales

Roles:

- Scrum Master
- Software Developer
- Machine Learning Analyst
- UX/UI Designer

The Team- Bhagawat Chapagain

Roles:

- Software Developer
- Machine Learning Analyst
- UX/UI Designer

Background and Motivation

- **Project Selection:** Option 3
- **Motivation:** Increase in demand for reliable lie detection in various contexts.
- **Impact:** Promises to enhance personal and professional interactions by ensuring honesty.

*Sample Audio Clip When Processed

Our Technology Stack

- Data Preprocessing: MatLab
- UI/UX Design: PyQt5
- Machine Learning Platform: Kaggle
- Database: MongoDB
- Integration Diagram: Visual of how each technology is used within the project.

Core Functionalities

*Sample Audio Clip On Spectrogram

Key Features:

- Analysis Of Voice Stress
- Determines Lies Based On Patterns

Live Demo

Achievements, Challenges and Solutions

- **Major Challenges:** Database connection issues, Lack of Communication, Lack of Group Involvement
- **Solutions:** Backend optimization for enhanced performance.
- **Timeline Impact:** Additional days added to the project timeline.

Future Directions

- Next Steps: Further data analysis, UI enhancements, and user testing.
- Long-Term Goals: Expand the app's capabilities and improve user satisfaction.
