The eBay app provides essential features (basic cases) to **save search patterns** (for both simple and advanced), performing **searches**, **edit** saved search patterns, and **delete** saved search patterns. The problems this GUI solves is that it searches unlimited saved search patterns and it will only show new matches across saved searches every time the “search” button is pressed by a user.

Save (Simple/Advanced) Search Pattern Basic Case:

The user types in the text box in the eBay app and clicks confirm.

The user clicks on “Advanced.”

The user types in the text boxes and clicks confirm.

Criteria 1

Criteria 2

Criteria 3

Criteria 4

Confirm

Save (Simple/Advanced) Search Pattern Alternate Case:

If the user clicks confirm without typing anything, then the eBay app would warn the user to type a search and then click confirm.

Advanced

Enter a search and press confirm.

Confirm

Search

Saved Searches

Criteria 1

Criteria 2

Criteria 3

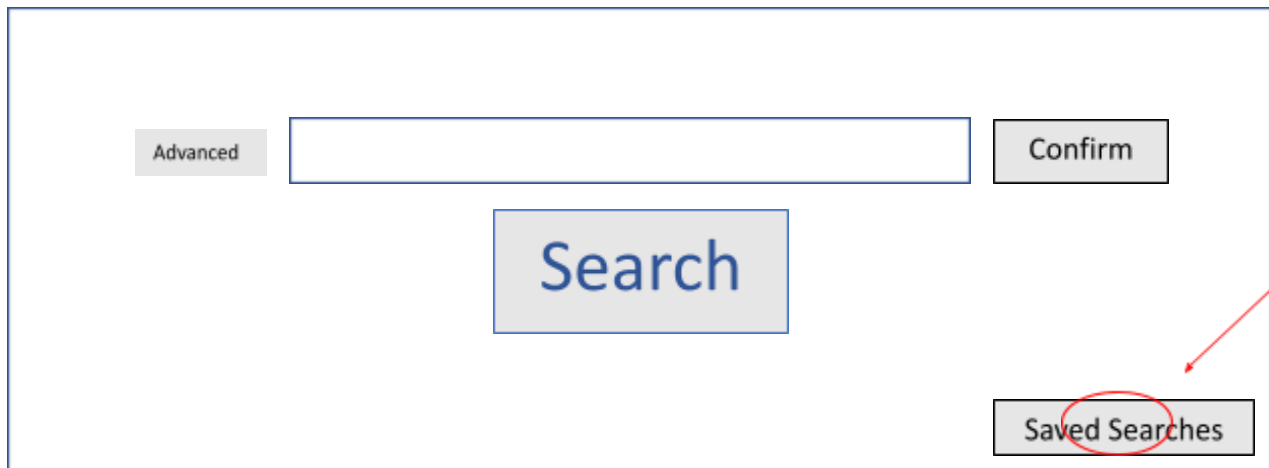

Criteria 4

Confirm

Enter criteria and press confirm.

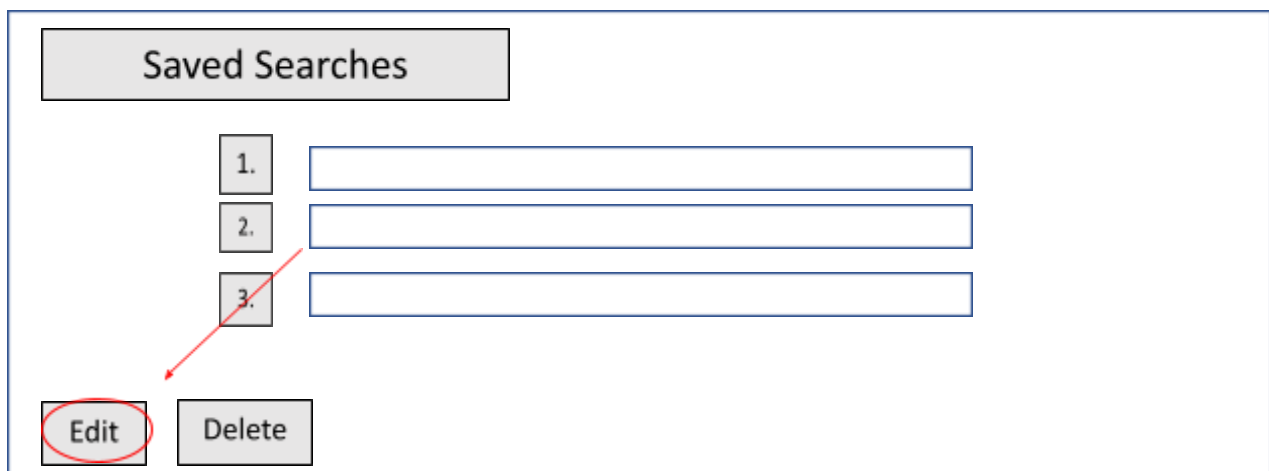

Edit Saved Search Basic Case:

The user clicks on “Saved Searches” in the eBay app.

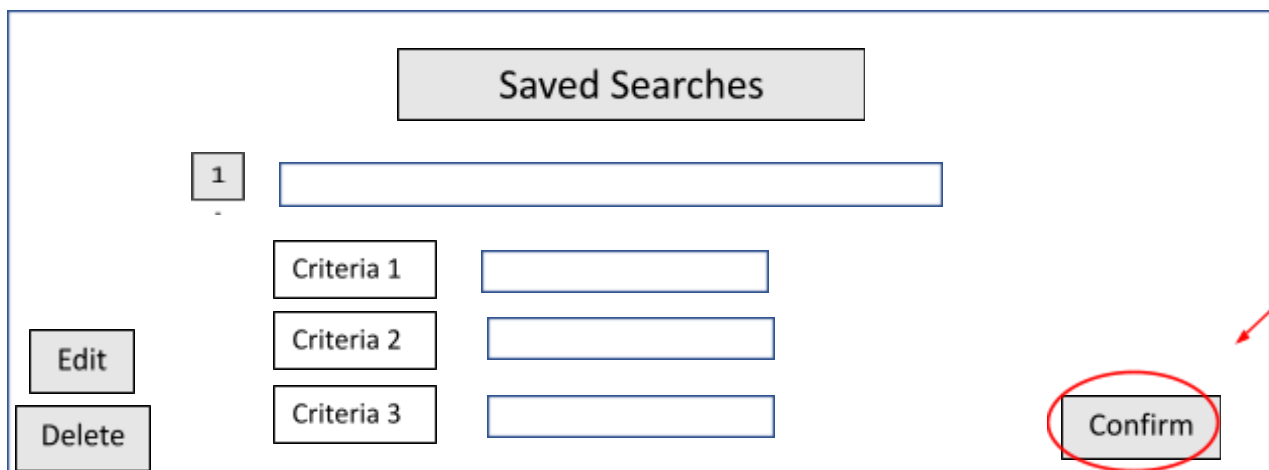

A diagram of the eBay app search interface. It features a top navigation bar with a grey "Advanced" button on the left, a large white search input field in the center, and a grey "Confirm" button on the right. Below the search bar is a large blue "Search" button. At the bottom right, there is a grey "Saved Searches" button, which is circled in red. A red arrow points from the right edge of the screen towards this button.

The user clicks on “Edit.”

A diagram of the "Saved Searches" screen. At the top is a grey header with the text "Saved Searches". Below it is a list of three search entries, each consisting of a small grey box with a number (1., 2., 3.) and a white text input field. A red arrow points from the right edge of the screen towards the "Edit" button at the bottom left. The "Edit" button is a grey rectangle circled in red, next to a grey "Delete" button.

The user either fills out the text boxes or changes them to their liking and clicks “Confirm.”

A diagram of the "Edit Saved Search" screen. At the top is a grey header with the text "Saved Searches". Below it is a list of search criteria. The first entry is a small grey box with the number "1" followed by a white text input field. Below this are three rows, each with a grey box labeled "Criteria 1", "Criteria 2", and "Criteria 3" respectively, followed by a white text input field. At the bottom left are two grey buttons: "Edit" and "Delete". At the bottom right is a grey "Confirm" button, which is circled in red. A red arrow points from the right edge of the screen towards this button.

Edit Saved Search Alternate Case:

If the user tries to edit a search without having any saved searches, then the eBay app tells the user “No Saved Searches to Edit.”

This screenshot shows a user interface for editing saved searches. At the top, there is a header bar with a 'Saved Searches' button on the left and 'Edit' and 'Delete' buttons on the right. The main content area features a large rectangular box with the text 'No Saved Searches to Edit'. In the bottom right corner, there is a 'Confirm' button.

If the user does not edit a search and clicks confirm, then the eBay app would tell the user to edit a criterion and press confirm.

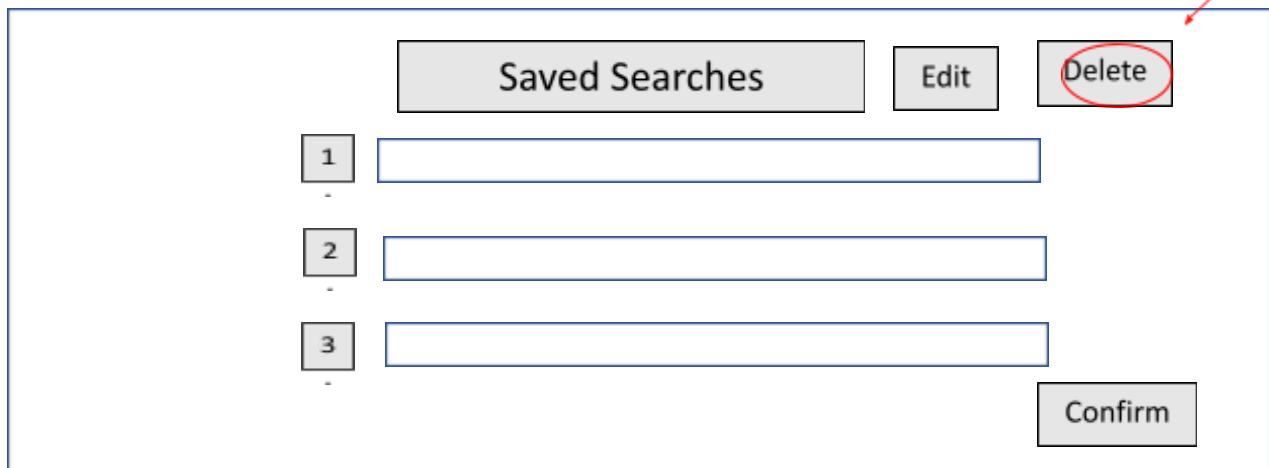

This screenshot displays the 'Edit a criterion' screen. The top header bar contains a 'Saved Searches' button. Below the header, on the left, are 'Edit' and 'Delete' buttons. The main area is divided into two columns. The left column contains a list of criteria: 'Criteria 1', 'Criteria 2', and 'Criteria 3'. To the right of each criterion is an input field. Above the first input field is a small box containing the number '1'. To the right of the input fields is a red text prompt: 'Edit a criterion and click confirm.'. At the bottom right, there is a 'Confirm' button.

Delete Saved Search Pattern Basic Case:

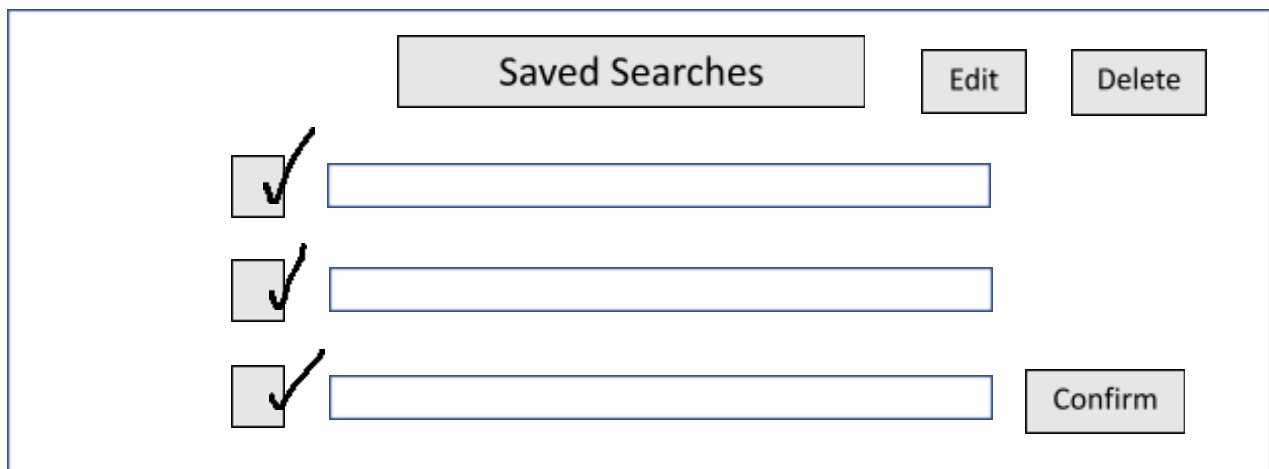

The user clicks on “Saved Searches” in the eBay app.

This screenshot shows the 'Delete Saved Search Pattern Basic Case' screen. At the top, there is a header bar with an 'Advanced' button on the left and a 'Confirm' button on the right. Below the header, on the left, is a 'Saved Searches' button. In the center of the screen, there is a large 'Search' button.

The user clicks on “Delete.”

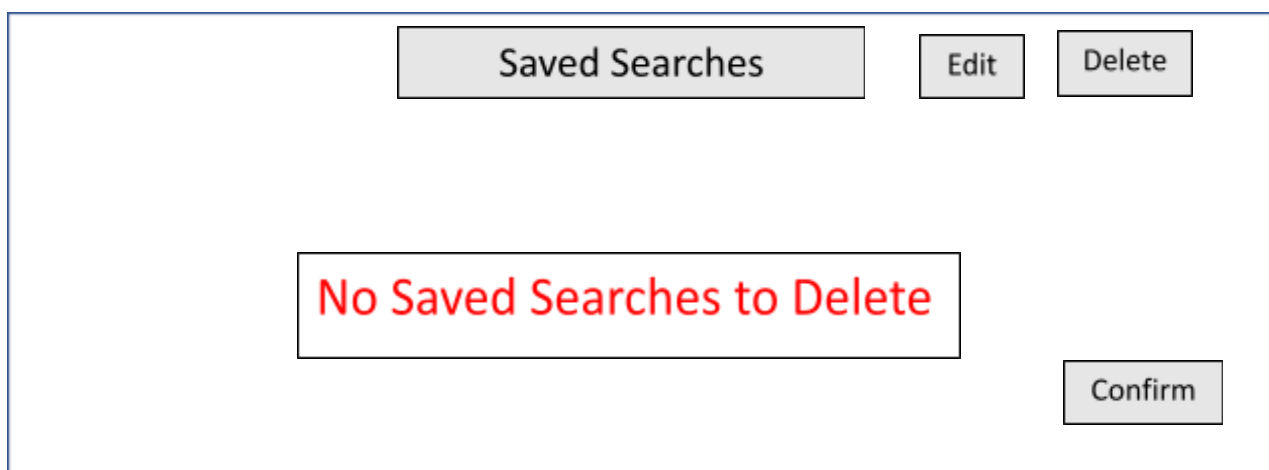

This screenshot shows the 'Saved Searches' interface. At the top, there is a header bar with a 'Saved Searches' button, an 'Edit' button, and a 'Delete' button. The 'Delete' button is circled in red, and a red arrow points to it from the top right. Below the header, there are three search entries, each with a number in a small box (1, 2, 3) and a text input field. At the bottom right, there is a 'Confirm' button.

This screenshot shows the 'Saved Searches' interface after the user has clicked 'Delete'. The 'Delete' button is no longer circled. Instead, each of the three search entries now has a checkbox to its left, and each checkbox is checked with a handwritten checkmark. The 'Confirm' button remains at the bottom right.

Delete Saved Search Pattern Alternate Case:

If the user tries to delete a search without having any saved searches, then the eBay app tells the user “No Saved Searches to Delete.”

This screenshot shows the 'Saved Searches' interface when there are no saved searches. The header bar contains the 'Saved Searches', 'Edit', and 'Delete' buttons. In the center of the interface, there is a large box with the text 'No Saved Searches to Delete' in red. A 'Confirm' button is located at the bottom right.

If the user does not uncheck a box and clicks confirm, then the eBay app would tell the user to uncheck a box to remove it and press confirm.

Saved Searches

Edit Delete

☒

Uncheck a box to delete a search and click confirm.

Confirm

Perform Search Basic Case:

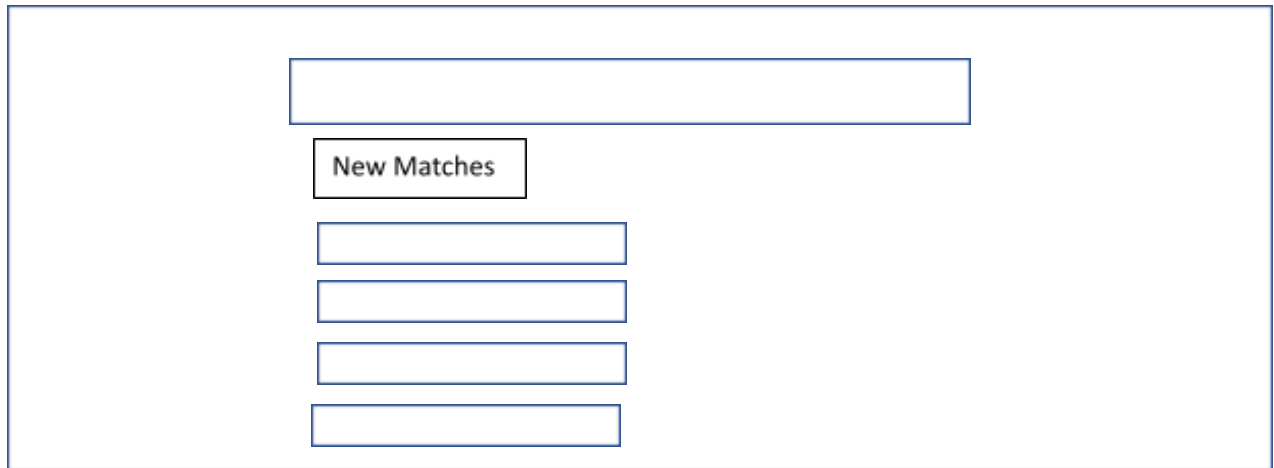

The user clicks on the “Search” button in the eBay app to search for new matches on all saved searches.

Advanced Confirm

Saved Searches

Search

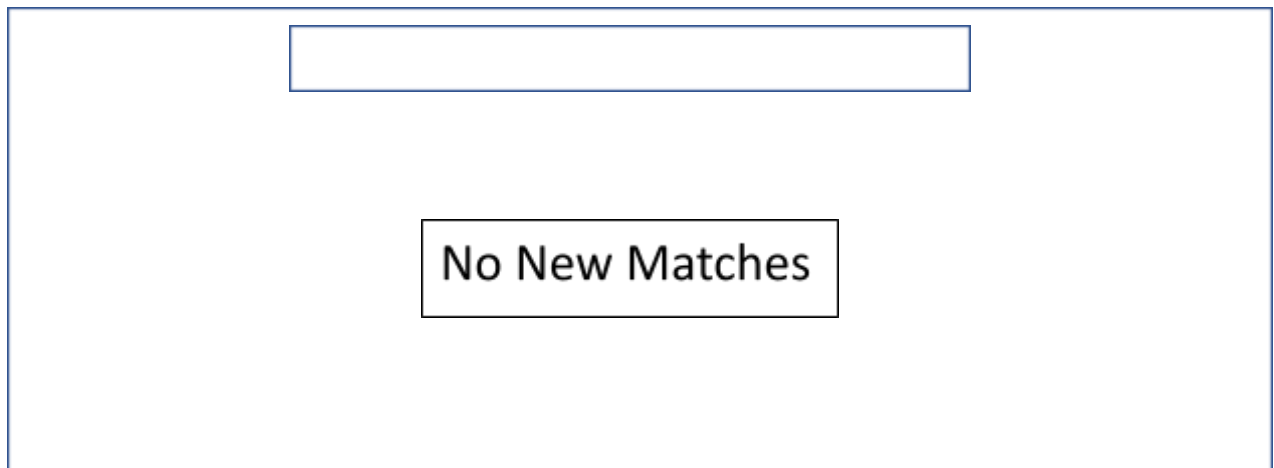

The eBay app pulls the new matches directly from the eBay website and removes the intermediary step of the user searching emails or going to the site directly.

A UI mockup for a mobile application screen. At the top, there is a wide, empty rectangular box. Below it, the text "New Matches" is centered within a rectangular box. Underneath the text box, there are four empty rectangular boxes stacked vertically, representing a list of matches.

Perform Search Alternate Case:

If the user already searched for new matches before the eBay website could pull anymore new results, then the eBay app tells the user "No New Matches."

A UI mockup for a mobile application screen. At the top, there is a wide, empty rectangular box. In the center of the screen, the text "No New Matches" is displayed within a rectangular box.

I pledge my honor that I have abided by the Stevens Honor System. Octavio Morales
