

Polling Application

- Octavio Morales
- Allan Joseph
- Birva Patel
- Brandon Lopez

Users

Stores all user-related information, enabling profile creation, book club participation, and discussion involvement.

```
{
  "firstName": "Example",
  "lastName": "Student",
  "email": "exampleStudent@example.com",
  "username": "exampleStudent123",
  "passwordHash": "hashed_password",
  "joinedDate": "2024-03-31",
  "readingList": ["bookId1", "bookId2"],
  "bookClubsJoined": ["clubId1", "clubId2"],
  "reviewsPosted": ["reviewId1", "reviewId2"],
  "Bookmarks": {"clubs": ["clubId1"], "events": ["eventId"], "books":
["bookId"]}
}
```

Name	Type	Description
firstName	String	User's first name.

lastName	String	User's last name.
email	String	User's email address.
username	String	Unique username chosen by the user.
passwordHash	String	Hashed password for secure authentication.
joinedDate	Date	The date the user joined the platform.
readingList	Array	List of IDs of books the user is interested in.
bookClubsJoined	Array	List of IDs of book clubs the user has joined.
reviewsPosted	Array	List of IDs of reviews posted by the user.

Book Clubs

Manages all book clubs created on the platform, including their members, current book discussions, and discussion threads.

```
{  
  
  "_id": "clubId1",  
  
  "name": "Classic Literature Lovers",
```

```
"description": "A book club for fans of classic literature",  
"Meetings": "Online / in-person every saturday 6pm EST",  
"currentBook": "bookId3",  
"members": ["userId1", "userId2"],  
"discussions": ["discussionId1", "discussionId2"]  
}
```

Name	Type	Description
_id	String	A unique identifier for the book club.
name	String	Name of the book club.
description	String	Brief description of the book club.
currentBook	String	ID of the book currently being read by the club.
members	Array	List of user IDs of members in the book club.
discussions	Array	List of IDs for discussions within the book club.

Books

Stores detailed information about books, facilitating book discovery, recommendations, and reviews within the platform.

```
{  
  
  "_id": "bookId3",  
  
  "title": "Pride and Prejudice",  
  
  "author": "Jane Austen",  
  
  "genre": "Classic Literature",  
  
  "synopsis": "A romantic novel of manners...",  
  
  "publishedDate": "1813-01-28",  
  
  "ratings": [5, 4, 5, 3],  
  
  "reviews": ["reviewId3", "reviewId4"]  
  
}
```

Name	Type	Description
_id	String	A unique identifier for the book.
title	String	The title of the book.
author	String	The author of the book.
genre	String	The genre of the book.

synopsis	String	A brief summary of the book.
publishedDate	Date	The date the book was published.
ratings	Array	List of ratings given by users.
reviews	Array	List of IDs of reviews related to the book.

Reviews

Manages user-generated reviews for books, including ratings and textual feedback, enhancing community insights on reading materials.

```
{
  "_id": "reviewId3",
  "bookId": "bookId3",
  "userId": "userId1",
  "rating": 5,
  "text": "An insightful exploration of social mores and personal pride...",
  "postedDate": "2024-04-01"
}
```

Name	Type	Description
------	------	-------------

_id	String	A unique identifier for the review.
bookId	String	The ID of the book being reviewed.
userId	String	The ID of the user who posted the review.
rating	Integer	The rating given by the user.
text	String	The text of the review.
postedDate	Date	The date the review was posted.

Discussions

Holds discussion threads related to book clubs, facilitating interactive dialogue among members on various topics.

```
{
  "_id": "discussionId1",
  "clubId": "clubId1",
  "messages": [
    {
      "userId": "userId1",
      "message": "What did everyone think about the character development of Elizabeth Bennet?",
      "postedDate": "2024-04-02"
```

```
}

```

```
]

```

```
}

```

Name	Type	Description
_id	String	A unique identifier for the discussion thread.
clubId	String	The ID of the book club this discussion belongs to.
messages	Array	A list of messages posted in the discussion thread.

Events

Manages book club meetings, author talks, and other related events, offering features for discovery, RSVPs, and participation tracking.

```
{
  "_id": "eventId1",
  "clubId": "clubId1",
  "title": "Monthly Discussion: Pride and Prejudice",
  "description": "Join us for our monthly book club discussion.",
  "date": "2024-05-01",
  "time": "18:00",

```

```
    "location": "Virtual",  
  
    "participants": ["userId1", "userId3", "userId5"]  
  
}
```

Name	Type	Description
_id	String	A unique identifier for the event.
clubId	String	The ID of the book club hosting the event.
title	String	The title of the event.
description	String	A brief description of the event.
date	Date	The date of the event.
time	String	The time when the event starts.
location	String	The location of the event (virtual or physical).
participants	Array	List of user IDs of participants.

Notifications

To manage notifications for users about updates, such as new book clubs, discussions, events, or reminders, keeping the community engaged and informed.

```
{
  "_id": "notificationId1",
  "userId": "userId1",
  "type": "Event Invitation",
  "message": "You are invited to the 'Monthly Discussion: Pride and Prejudice' event.",
  "date": "2024-04-15",
  "readStatus": false
}
```

Name	Type	Description
_id	String	A unique identifier for the notification.
userId	String	The ID of the user the notification is for.
type	String	The type of notification (e.g., Event Invitation).
message	String	The notification message.

date	Date	The date the notification was sent.
readStatus	Boolean	Whether the notification has been read by the user.

Book Progress

Book Progress is a subdocument of Users. It simplifies tracking users' reading activities, such as books they plan to read and their progress.

```
"readingGoals": [  
  
  {  
  
    "bookId": "bookId3",  
  
    "status": "In Progress"  
  
  },  
  
  {  
  
    "bookId": "bookId4",  
  
    "status": "Completed"  
  
  }  
  
]
```

Name	Type	Description
readingGoals	Array of Objects	List of books with their IDs and reading statuses (e.g., "In Progress", "Completed").
bookId	String	A unique identifier for the discussion thread.
status	String	An identifier for the progress of the book the user is currently reading. It is either "In Progress" or "Completed".
